Case Study

Jewish Burial Ground, Wolverhampton

Red Plait was commissioned by the Board of Deputies Heritage to write a site management plan for this disused Jewish burial ground.

Working with the Institute of Cemetery and Crematorium Management (ICCM), we provided a comprehensive assessment of the cemetery; its built and natural features. The report also included a site history, a phased program of repair and development recommendations according to available resources and the site's historical significance.

The community consultation was wide reaching and diverse, given the limited numbers of the Orthodox Jewish community.
